SHURE
STEM ECOSYSTEM™

Huddle Room Reference Design

This design highlights just one of a few ways you can configure Stem into your huddle rooms. Below you can see Stem Ceiling paired with Hub and Control. Each Stem device is connected directly to your network via a single Ethernet cable. Stem's ecosystem approach gives you the freedom to mix and match devices to create your own customized setup. If a Stem Wall or Stem Table is more your style, go for it. This is your room. Design it to fit your needs.

Mix and match all Stem devices for a customized audio solution.

Set up, control, and manage your rooms and devices on your network.

Stem solutions are compatible with your favorite conferencing platforms.
