# STEM ECOSYSTEM™

# Large Conference Room Reference Design

See the reference design below? That's just one of many ways you can integrate Stem into your large sized conference rooms. Below you can see two Stem Table's and a Wall paired with Stem Hub and Control. Each device is connected directly to your network via a single Ethernet cable. The beautiful thing about all Stem Audio devices is you can mix and match them to create your own customized setup. If three Stem Ceilings or three Stem Walls are more your style, go right ahead. This is your room. Design it to fit your needs.

Mix and match all Stem devices for a customized audio solution.

Set up, control, and manage your rooms and devices on your network.

Stem solutions are compatible with your favorite conferencing platforms.
