# SHURE
## STEM ECOSYSTEM™

# Medium Conference Room Reference Design

This design showcases just one of a few ways you can configure Stem into your medium sized conference rooms. Below you can see two Stem Ceiling's accompanied by Stem Hub and Control. Each Stem device is connected directly to your network via a single Ethernet cable. The beautiful thing about all Stem Audio devices is you can mix and match them to create your own customized setup. If two Stem Tables or two Stem Walls are more your style, go for it. This is your room. Design it to fit your needs.

Mix and match all Stem devices for a customized audio solution.

Set up, control, and manage your rooms and devices on your network.

Stem solutions are compatible with your favorite conferencing platforms.
